## CHRONIC MERCURY EXPOSURE SIGNS & SYMPTOMS

### LOCAL ORAL CAVITY

- ❖ Amalgam tattoos
- ❖ Aphthous ulcers
- ❖ Excessive salivation
- ❖ Leukoplakia
- ❖ Metallic taste
- ❖ Periodontal disease
- ❖ Stomatitis
- ❖ Swollen tongue with scalloped edges

### PSYCHOLOGICAL

- ❖ Depression and anxiety
- ❖ Inability to make decisions (esp. recent)
- ❖ Insomnia
- ❖ Irritability and unreasonable anger
- ❖ Short term memory loss

### NEUROLOGICAL

- ❖ Diffuse myalgia
- ❖ Headaches (often migraine type)
- ❖ Impaired visual fields, acuity
- ❖ Muscular weakness
- ❖ Paraesthesia
- ❖ Tinnitus
- ❖ Tremors

### CARDIOVASCULAR

- ❖ Chest pain
- ❖ Tachyarrhythmias

### GASTRO-INTESTINAL

- ❖ Abdominal pain (often mimicking ulcers)
- ❖ Colitis
- ❖ Constipation
- ❖ Diarrhoea
- ❖ Food intolerances

### IMMUNOLOGICAL

- ❖ Allergies
- ❖ Candidiasis
- ❖ Leukocyte abnormalities
- ❖ Lymphadenopathy
- ❖ Sinusitis

### ENDOCRINOLOGICAL

- ❖ Cold hands and feet
- ❖ Excessive chronic fatigue
- ❖ Excessive perspiration
- ❖ Subnormal temperature

### URINO/GENITAL

- ❖ Frequency
- ❖ Loss of libido
- ❖ Nocturia

### INTEGUMENTARY

- ❖ Pruritus
- ❖ Unexplained rashes

These are **NOT** the symptoms of toxicities as a result of electrical interferences, dead or root filled teeth or bone cavitations (osteitis).

# PROBLEMS OF AMALGAM REMOVAL

## 1. Sensitive Teeth

Solution:

- ❖ Call us
- ❖ Take homoeopathics we have issued to you

## 2. Flexing Composites

Solution:

- ❖ Call us

## 3. After the last amalgam has been removed you may feel: irritable, depressed, have “flu-like” symptoms, decreased IQ.

Solution:

- ❖ Call us and have an outside reference

## 4. Problems of Improved Immunity

Due to the elimination of electrical disturbances and improved immunity, chronic conditions can go acute ( and then heal ). The most common of these are acute sinusitis and unknown dead teeth flaring up.

Solution:

- ❖ Call us

## 5. Heavily filled teeth may have nerve involvement that is not evidenced on xrays.

International research suggests a 7% incidence of root therapy if “virgin” teeth are treated, and up to 30% if heavily filled teeth are refilled or crowned.

Should teeth become abscessed/die:

Solution:

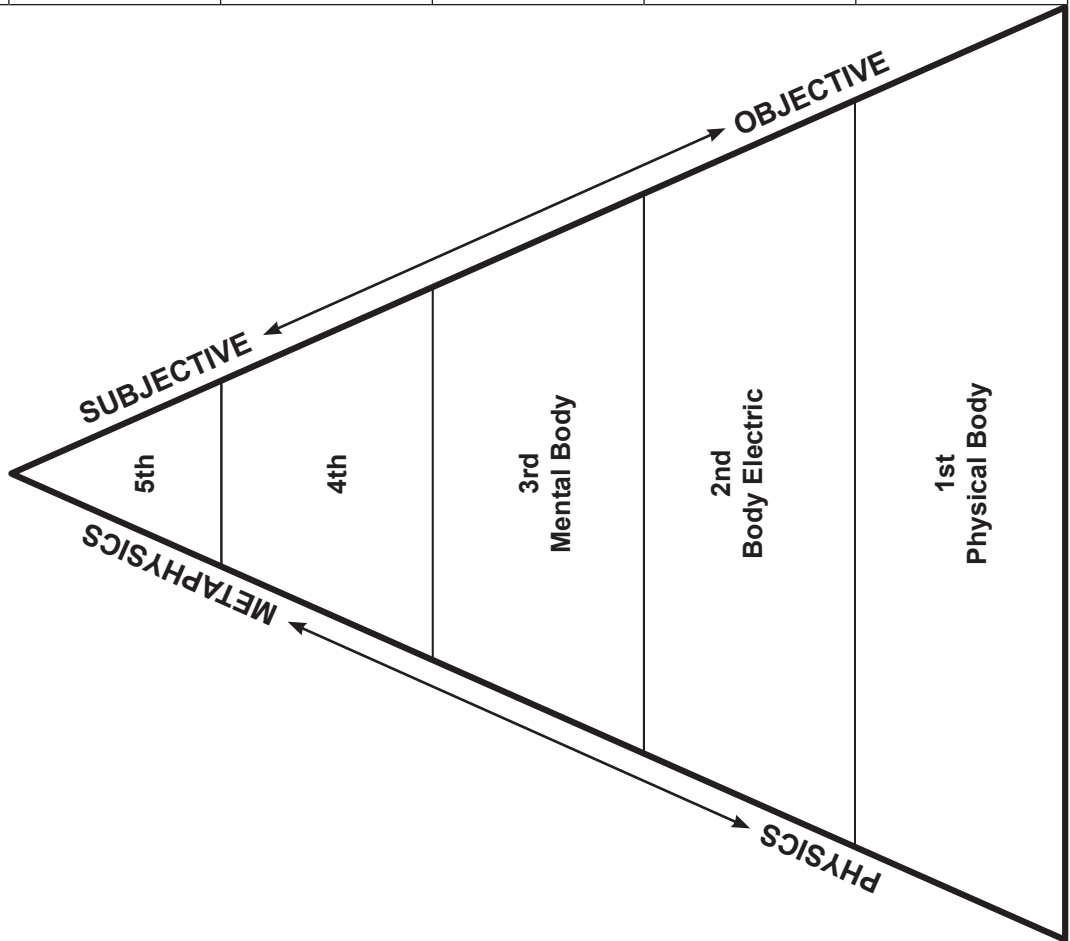

- ❖ Root fill the tooth *or*
- ❖ Surgically extract it.
